

❖ PIER TALK ❖

837th U.S. Army Transportation Battalion (Terminal)

4th Qtr, FY 2005

Commander's Corner

LTC Richard J. Kramer
Battalion Commander

Amazingly, another quarter has quickly come to an end. I've asked a lot from the staff by challenging them to raise the bar and attempt new ways of doing business in the KTO and they have not disappointed me. Their professionalism and technical expertise continues to astound me with each mission and tasking issued.

We finished the quarter very strong by completing 7 operational missions in the last 3 weeks of the year: Navy Fleet Hospital swap out of almost 1,000 pieces; 2 III MEF redeployment vessels; the 82nd Eng Co and 5-5 ADA Bn restationing moves, illumination round shipment to SWA and the shipment of retrograde equipment out of the KTO.

I'm especially pleased with the Navy Fleet Hospital operation: CPT Wolfe put the CONOPS together for the Navy and the theater and it was executed flawlessly. The Navy was quite pleased with the whole operation which was conducted over a 24 hour period of unloading and loading both containers and unit equipment. This was our 10th mission in Gwangyang over the last year. We are now comfortable that we were able to get a good portion of the unit familiar with the port during operations as well as getting the commercial stevedores and managers used to supporting military operations.

Additionally, we opened Mokpo Seaport this quarter by conducting both the deployment and redeployment of the III MEF who were participating in UFL 05. The "proof of concept" provides the KTO

XO's Corner

MAJ Terry Draper
Battalion Executive Officer

Blink your eyes and it's gone...another quarter of hard work and effort that is. We've been working hard for the past year and this quarter was no different. While I could detail the ports worked and the units moved out/in to the theater, it would just be easier to say that the KARGO KINGS mounted up, moved out and completed each and every mission safely and successfully...at Busan, Chinhae, Mokpo and Gwangyang (couldn't resist).

We said farewell to COL Harvey who served us well for two years as the 599th Group Commander, but COL Kreklow has stepped up to the plate and is ready to take her swings! We welcomed her to Pier 8 during her initial visit to Korea as the Group Commander during Ulchi Focus Lens 05 in August 05. We look forward to serving with her as she leads the 599th into the future in support of the global war on terrorism and in support of Army transformation.

I would also like to extend warm greetings to our new sergeant major, SGM Jacobs. He comes to us with solid credentials from Ft. Eustis. While he has a truck background, he has wasted no time in hitting the piers running and learning every aspect of port and vessel operations. We look forward to his support and contributions over the next year and wish him all the best!

While we welcomed some new members to the team, we also have to say farewell to other members of the "family." Mr. Vandersys, Plans Chief, will be leaving us

for another position in Korea. Fred has served the battalion well for many years and will be missed. We also have to say farewell to Mrs. Kathleen Bruce, Management Support Assistant, who departs for the states. She also served the battalion well for the short time she was in the organization and will also be missed. Both of these fine people have served the battalion, group and the U.S. Army extremely well and while we'll miss their contributions, I wish them well in all of their future endeavors.

We'll see a slow down in operations starting 1 Oct 05 and that's a good thing for a while. The members of this organization have put forth every effort to support not only SDDC, but the Korean theater. When I think we can't take on any more missions, taskers or requirements, the men and women of the 837th Transportation Battalion mount up, move out and say "LET'S GO TO WORK!"

Coordination, communication and synchronization...keys to all successful missions!

KARGO KING XO

MAJ Draper (right) hosting COL William Gibson, CDR, AMC-FE.

SGM's Corner

SGM Willie L. Jacobs
Sergeant Major

Greetings Kargo King! I am both honored and excited to be the Battalion Sergeant Major for this great organization. I am coming from Fort Eustis, Virginia where I served as the Sergeant Major for the Transportation School. I am married to Della Jacobs and we have two sons. She is residing in Columbia, SC along with one of my sons, while the other lives in Virginia attending Christopher Newport University.

I have had many assignments in my 23 years of military service but this will be the first one that has placed me at a sea port. However, through many deployments using line haul, rail, and ships, I understand the work that is associated with port operations and how vital the 837th Transportation Battalion is to the overall success of the Army accomplishing its mission.

Over the past two months, the 837th has been very busy. We have hosted the 614th TC Detachment during their annual train-

ing at Pier 8, welcomed the Group Commander along with the Sergeant Major and others from the Group while participating in UFL and conducting other real world missions from various ports here in theater. Throughout it all, I am both impressed and pleased to see the professionalism and hard work displayed by everyone assigned to the organization. As we continue to perform these missions, I hope to use my experience and background to further enhance what is already a great Battalion. In the fulfillment of my duties and responsibilities, I look forward to working with each and every one of you. My door is always open so, if you ever need to see me, please feel free to come into my office.

Over the last quarter a number of awards and promotions were given out which attest to the quality of people we have in the organization. Some of you have attended school during this time frame. The most noteworthy was the primary Leadership Development Course which was attended by CPL Moon. He represented himself and the Battalion well as he marched across the stage to receive his diploma during the graduation ceremony at Camp Jackson. My congratulations goes out again to everyone who completed their course and received an award, keep up the good work. Many of you celebrated birthdays this quarter so once again, Happy Birthday! Also congratulations to our KATUSAs for bringing the 837th another trophy for winning the soccer tournament here in Pusan!

Over the next couple of months our workload will decrease. This will give us an opportunity to focus more on training in order to maintain and improve on the skills that are necessary for us to accomplish our mission. Strong emphasis will be placed on training with our automation systems and critical tasks that enable us to

survive during peace time and war time. The first two key events will be a weapons qualification range followed by an NBC range. The training schedule will reflect other events so make sure that you read it so that you will be prepared for all scheduled training. Once again, I look forward to working with all of you. Kargo Kings!

Terminal Operations Section

Mr. Gonzo Rivera
Chief, Terminal Operations

The Operations Section recorded another busy quarter with marked increases in workload, missions and exercise support. In spite of this, the Operations Section was able to provide and participate in valuable training opportunities, real world missions, and continued to host our USAR wartraced units with Battle Focus Training for the 614th Automated Cargo Documentation Transportation Detachment during their RSOI Overseas Deployment Training (ODT).

Following the Commander's guidance, the Operations Section continues to focus on ways to exercise as many Strategic /

Shawnee Princess

Alternate ports as possible in peace-time and maintains port studies and capability data that will substantiate the use of these ports with expanded throughput capability during contingencies and surge war-time requirements.

Thor Falcon

Although USTRANSCOM, PACOM and SDDC have identified strategic / alternate ports throughout the Korean Theater of Operation (KTO) for use during contingencies and surge unit moves, seldom before had we exercised our ability to effectively conduct efficient port operations from most of these ports. Conducting routine port operations from these strategic / alternate ports will not only increase our transportation throughput capabilities within the KTO, but will prevent readiness implications during contingencies.

During this last quarter, the Operations Section deployed a Deployment and Distribution

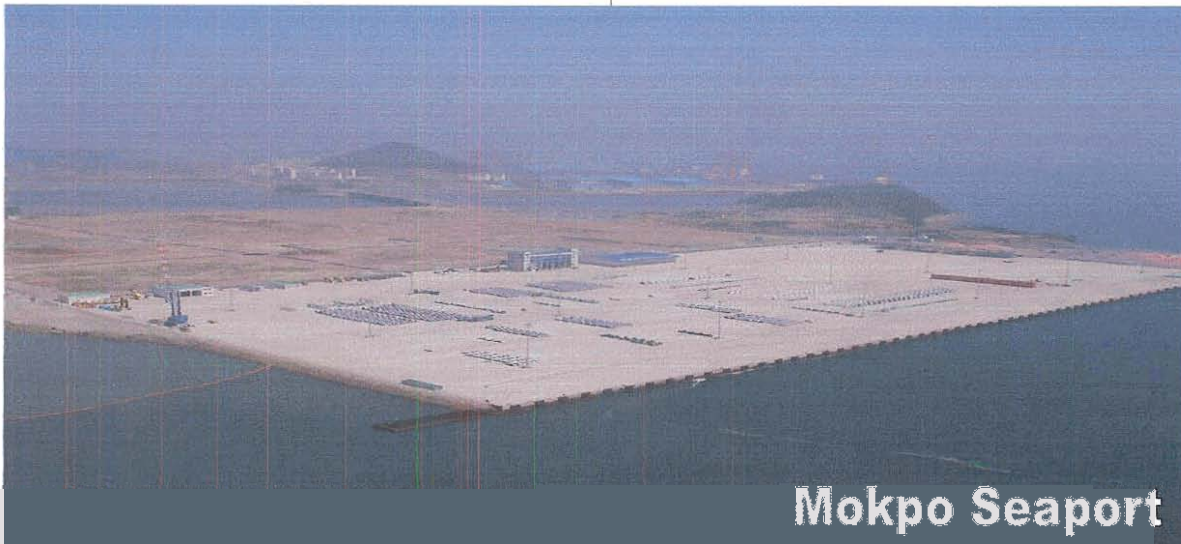

Support Team (DDST) to Chinhae in time to support the ROK POG conduct AMMO vessel operations in support of Turbo Cads 05. The DDST was responsible for providing 100% in-transit visibility (ITV) of all cargo discharged and loaded using RFID technology and WPS, including writing RFID tags.

We also conducted discharge, reception, staging, and coordinated for onward movement operations at Mokpo Newport in support of UFL 05. The Operations Section discharges and backloads the Shawnee Princess, the Thor Falcon and the Green Point at the Port of Mokpo in support of the UFL 05 exercise while providing terminal operations and service support for the deployment and redeployment of the III MEF USMC cargo from and to Okinawa

Navy Fleet Hospital Mission

The Operations Section also completed the equipment transfer of the Navy Fleet Hospital at Gwangyang KIT New Terminal.

Conducting this operation at the Seaport of Gwangyang continues to demonstrate the concept that we have other viable ports within the Korean Peninsula for future

Mokpo Seaport

strategic/contingency operations in the Korean Theater of Operations.

In addition to supporting numerous vessel operations during this quarter, members of the Operations Section attended a two week ICODES 5.4 version fielding and training class hosted by the 836th Transportation Battalion at Yokohama, Japan. Training on the new ICODES version being fielded was provided by CDM Technologies and the SDDC ICODES Project Manager. One of the highlights of the new ICODES version 5.4 is the ability to push and receive corrected load data directly from WPS into ICODES. ICODES users can now scrub equipment list sent from WPS early on during the loading process preventing extensive reconciliation during preparation of final vessel papers.

The Operations Section closed out this busy quarter and FY05 operations with the transfer of the 5/5 ADA's equipment to Fort Lewis, Washington; transfer of the 82nd Engineer Company to Hawaii; a large shipment of Illumination Rounds to Kuwait in support of Operation Iraqi Freedom, and UFL 05 redeployment of the USMC III MEF back to their home station in Okinawa, Japan. Three vessels and three Deployment and Distribution Support Teams were required to complete these near-simultaneous vessel operations at three different ports.

Cargo Distribution Section

Mr. John Scott
Chief, Cargo Distribution Section

Nothing less than excellence has been the performance level of personnel assigned to CDS. It has been six months since my arrival and the pace has been nonstop. I am truly grateful and appreciative of our folks for their hard work and dedication.

In the area of training, CDS personnel participated in the battalion's CHEMEX (NBC Training) in August. Two Mobility

NCOs, SSG Bruce and SSG Colbert, both assigned to CDS, were instructors for the exercise.

SSG Colbert attended WPS training, 11-23 Sep 05 in Hawaii. His training will add value to the DDST's during deployments/vessel operations.

My Deputy, Dr. Son, attended the NDTA Conference in San Diego. It was a very enlightening trip for him. Besides meeting old and new acquaintances he really enjoyed listening to the industry and military leaders talk about transportation and logistics issues.

CDS personnel received BCS3 training, 21-23 Sep 05. This system is another source capability to track cargo in a real time mode.

Combination vessel service (commercial liner and MSC) continue to support unit deployments and redeployments. This

SSG Bruce gives training on the M256 Kit during the Battalion Quarterly CHEMEX.

dual capability provides increased shipping resources and ensures a deploying unit's movement timeline and RDD are met.

Commercial and MSC vessel service supported the following moves:

CAPE FLATTERY/VOYDOC F5009:

505 AMMO containers were shipped from Chinhae to Utah. Vessel departed 28 Jul 05.

USNS WATKINS/VOYDOC F5010:

32 M1A1 tanks and 1 container were shipped from Pier 8 to Anniston, AL on 8 Aug 05.

GREEN POINT/VOYDOC F5510:

MSC-K and DDDK shipped a combined 140 pieces of cargo to California and Texas. The vessel departed 20 Aug 05.

MOL MASS/VOYDOC F5513:

APL supported the 35 MTVR Marine shipment to Kuwait in a two-vessel move. The MOL MASS shipped the first 15 vehicles which departed from Shinsundae Pier on 29 Aug 05.

APL CHIWAN/VOYDOC F5514:

APL provided the Chiwan for the second shipment of 20 vehicles to Kuwait for the marines. The Chiwan departed Shinsundae Pier 7 Sep 05.

ATLANTIC LEADER/VOYDOC 5011:

The Navy Fleet Hospital conducted a swap out and we shipped 464 pieces of cargo to Virginia on 11 Sep 05.

THOR FALCON/VOYDOC F5704:

The III MEF concluded UFL 05 operations and required to ship 324 pieces of cargo. The Thor Falcon shipped 179 pieces from Mokpo to Naha on 21 Sep 05. The remaining cargo is scheduled to be moved 1 Oct 05 on the Green Point.

STRONG AMERICAN/VOYDOC F5515:

This vessel is supporting the 82nd CSE restationing to Hawaii and the 5-5 ADA to Washington.

The 82nd will ship 122 pieces of cargo and the 5-5 will ship 130 pieces. The Strong American will also ship 65 pieces of cargo from MSCK and DDDK going to various locations in CONUS.

Reviewing and Updating Civilian Employee Position Descriptions (PD)

Mr. Eddy D. McLendon
Admin Officer

Reviewing: The best time for a supervisor's to review a position (job) description with an employee is during the initial counseling session with the employee. Supervisors should take the time in a formal setting to completely review the PD with the employee. Areas of the PD such as supervisory controls, major duties, performing other duties as required, and PD factors (if applicable) should be thoroughly discussed with the employee. The PD should be the basis for developing, with the employee's input, performance standards and goals. PD reviews between the employee and the supervisor should be on-going, but as a minimum accomplished at least annually. Also, employee PDs should be reviewed when a major unit reorganization or mission change occurs and when equipment changes or

upgrades increase or decrease the duties and responsibilities of an employee. PDs can be viewed and printed from the FASCLASS website at <http://cpsfc.belvoir.army.mil/fasclass/inbox/>.

Updating: Supervisors should ensure that PD updates are timely. Some requires only minor "pen and ink" changes while others with major changes may require a thorough position review. The supervisor should work closely with the unit's Human Resources representative. Within the 837th Transportation Battalion the Administrative Officer is the unit point of contact for all PD reviews. The Administrative Officer provides assistance and guidance to section supervisors in reviewing and updating their employee PDs. Any proposes changes are first coordinated with the servicing Civilian Personnel Advisory Center (CPAC) before final draft changes are sent on to the Civilian Personnel Operations Center (CPOC) for their final review and approval. After approval, the CPOC updates the revised or new PD in the Defense Civilian Personnel Data System (DCPDS).

Information Management Section

Mr. Insoo "James" Kim
Information Management Officer

In July 05, we received two new WPS-W carry away systems (Panasonic Laptop computers). The System Administrator completed software patches on these machines.

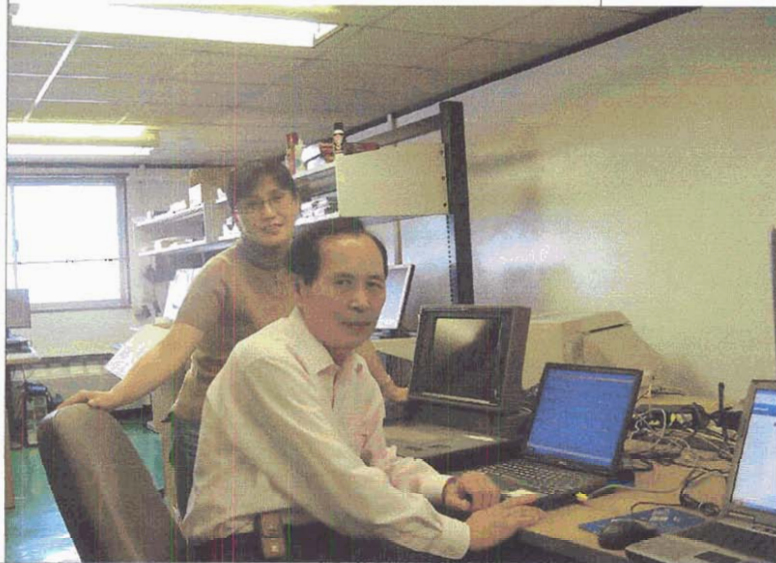

In July 05, TRANSCOM engineers, Mr. Chad VanderMeer, Nick Carstensen, and

599TG IM, Mr. Nick Rosse, visited and had meetings with 36th Sig Bn POCs and TNOSC-K personnel to change Foundry switch IPs to configure VLANs for 837th & 25th Trans Bn workstation nodes, RFID and BIDS. The actual cutover work was successfully executed on 27 Jul 05 and all user workstations IDs were migrated to the USFK network.

In July 05, received 32 new Dell desktop computers for the life-cycle replacement of old HP machines. All security patches and application software was installed and the distribution completed in August 05.

In September 05, both SIPRNET and NIPRNET accreditation packages were

Mr. Yi, Chong-won and Ms. Lara Spoerner working together complete software patches on WPS-W carry away systems for Panasonic laptop computers.

developed and submitted to 36th Sig Bn for review prior to DAA's approval.

In September 05, two BCS3 systems were installed and activated at the battalion. User training was provided for military personnel, DA civilians, and local national employees in CDS and OPS section.

KATUSA PERSPECTIVE

LOADING MISSION IN MOKPO

CPL Hwang, In-tae
Training Clerk

The mission in Mokpo took place during the time when the most celebrated holiday was going on in Korea, Chusok. Chusok is a time to be at home with enjoying the holiday with family and good food. Because of the mission in Mokpo not all of us could go home, at least one person was needed as an interpreter so, I volunteered. Besides, I had never been to Mokpo and thought that it would be a good experience for me.

As so many families traveled to their hometowns to celebrate Chusko, we felt the effects of the road congestion as we traveled to Mokpo. The trip normally takes 5 hours but took us a little over 6 hours this time because of the additional traffic.

The next day we went to the New Pier in Mokpo to set up the operating systems, WPS, ICODE, Notebooks and Printers. After work that day we were able to relax and enjoy Dongdong-ju, another Korean tradition. SFC Bell especially enjoyed that along with a Korean dinner. The Vessel came in on the 3rd day and we were unpleasantly surprised by the appearance because the Vessel looked like an old fishing boat. The Falcon, as it was called had 3 decks and a crane was used to remove the deck covers. The vessel height was not high enough for the bigger trucks so SFC Sprague had to make another load plan. There was no load plan available in the system for this type of ship so one had to be created by hand. Because of the characteristics of the vessel we could only manage to load 50 pieces in the first day.

CPL Hwang, In-tae presents his Pier 8 drawing to MAJ Draper. It can be observed on the wall next to the conference room.

There were others who also sacrificed their holiday to complete the mission and everyone worked. If more people would be that considerate we would live in a much better society.

SOCCKER

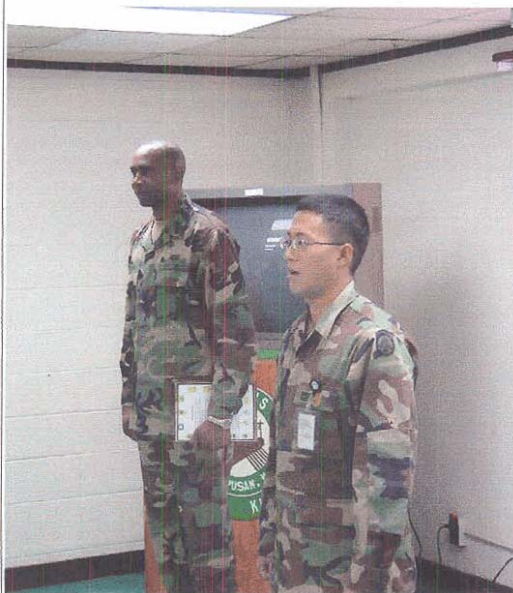

CPL Park., Seung-hyun
Operations Clerk

As you know competition brings out the best in all of us especially when it comes to sports. Our Soccer tournament was held from 28 through 29 September. The soccer games were played in the Busan area. As a result of our strong play and as members of last year's championship team, we occupied key positions on the field. The first game was against the 307th Signal in Daegu. We played with overwhelming emotion and energy but lost with a score of 1 to 0. This put us in the loser's bracket therefore we had to play the losers from the other bracket. Because of our competitiveness and desire to win, we won that game easily with a score of 3 to 1. We then had to play against the 188th MPs in Daegu and although we gave it our best, we lost with a score of 2 to 0. We had a great time and learned a lesson again on how important teamwork is. This was also another chance for us to build KATUSA and U.S. Soldier relationships these are the memories of the game that will stay with us for a long time. Although we didn't win the Championship Trophy for Area IV, we did win the Championship Trophy for Camp Hialeah.

2005 UFL

CPL Kim, Do-hyung
NBC Clerk

We joined 'Ulji Focus Lens' (UFL) exercise from 26 August through 2 September. This is a joint military exercise which demonstrates the ability of South Korea to defend itself in the event of an attack. We had 4 KATUSAs participate in the actual exercise, CPL Kim, CPL Hong, CPL Im, and CPL Koo.

The KATUSA who participated in the exercise assumed the roles as translators between ROKA and US Military. The first week of training was to evacuate people from South Korea to another country, (Japan) as if we were in an actual war time situation. The second week consisted of receiving Soldiers and equipment and placing them in their battle field positions. We success-

SGT Moon, Do-sik, new senior KATUSA soldier, recite NCO Creed at his promotion ceremony to become a NCO.

fully completed our mission and learned from it all. I feel that the exercise was valuable and I feel very confident that if we were put in a war time situation we could complete our mission with outstanding results.

Joining the Kargo Kings

Gonzalo "Gonzo" Rivera-Rivera, Jr.
Chief, Tml Ops

I finally landed where the water meets the pier. I'm Gonzo Rivera and can't start to express how happy I am to join the 837th Transportation Battalion. I'm sure if I keep my eyes and ears open and continue to learn from the professionals who make-up this great organization, maybe one day I too can be call a "Kargo King".

Since joining the civil service ranks, I have served as a plans officer with the 599th Transportation Group, Hawaii and completed a tour of duty with the 595th Transportation Group (Provisional) in Kuwait. Unlike some of my assignments as a former active duty soldier, this one with the 837th Trans Bn I chose. I applied for this job and was fortunate to have been selected to serve. I'm here at Pier 8, Pusan, Korea because I want to be here and because I asked for the opportunity to serve with the Kargo Kings. I'm finally where SDDC transporters can shine; at a port, right in front of a pier. My first 90 days on the job have been "*fast and furious*" though. In addition to numerous vessel operations, I got a good taste of RSOI, UFL, Turbo Cads and Kargo Spirit 05.

As I continue to settle in and learn from the "Kargo Kings", I look forward to what I'm sure will be a challenging, but very rewarding experience and a great tour of duty.

Commander's Corner

(Continued from page 1)

another seaport to exercise in peacetime to decrease congestion at the commercial ports and train stevedores at other locations. Next year we will explore opening Gunsan, Pyongteak and Busan Newport if missions provide the opportunities. Keep up the good work Kargo Kings! As we say here in Busan "bring it on!"
